

The Importance of Predators

Join Predator Defense as it kicks off its *20th Anniversary Lecture Series* with a fascinating look at why we need predators such as wolves, coyotes, cougars, and bears on our landscape.

Wildlife ecologist, author, and photographer George Wuerthner will present a slide show and lecture on the ecology of predators, how they shape ecosystems, and why they're critical to our survival.

- Free and open to the public -

NPS/Dan Stahler

Wednesday, June 30th 7:00 pm | The Campbell Center, 155 High Street, Eugene
